

FOAMIT

FOAMIT is a highly concentrated foaming cleaner formulated for fast removal of fats, oils, greases and other difficult soils.

Contains powerful biodegradable surfactants, emulsifiers, safe solvents, corrosion inhibitors, chelating agents, and special grease dissolving chemicals.

FOAMIT works in many difficult cleaning applications where ordinary liquid degreasers fail. May be used alone by diluting with water and using for a scrub soap or may be mixed with alkaline or acid compounds and applied as a foam.

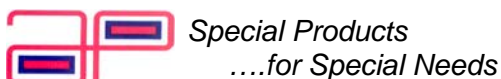

A very effective and high-powered foaming concentrate can be made by mixing three parts water with one part **FOAMIT**, one part sodium hypochlorite, and one part **ASTRO MAX #1**. This concentrate is diluted with more water when applied with the **Foam Master** foamer from Astro Products. Your Astro representative will assist you in determining the right mixture for your application. **FOAMIT** may also be applied with the **ELMO Foamer** or other suitable foaming equipment.

CAUTION: Always wear gloves, goggles and eye protection when handling caustic or acid chemicals. Always use with good ventilation. If chemicals are applied with air operated equipment that may create fumes or mists, wear the appropriate respirator to avoid breathing fumes.

USDA APPROVED for use in all departments of federally inspected meat and poultry processing plants.

Effective in **HARD WATER**

FOR USE BY: Poultry plants, Meat packing plants, Seafood processors, Vegetable processors, Bakeries, Beverage processors, confectioners.....
